Marek Lipčák, Frontend Developer

An experienced frontend developer with 6 years of professional experience in web development. I am passionate about building responsive user interfaces with performance and attention to detail in mind.

Employment History

Frontend Developer at Indra Avitech

May 2023 — Present

Part of a development team responsible for development and testing of frontend of applications used by employees in aviation sector. Greatly contributed to improving visual design and usability of developed products and increasing test coverage of the codebase.

Frontend Developer at GlobalLogic

November 2022 — April 2023

Lead the development of user interface for controlling sample registration module that processes samples of patients tissue in medical environment.

Frontend Developer at Workflows s.r.o

September 2018 — October 2022

Development, testing and maintenance of frontend projects, mostly for Austrian client NTS Retail. Built several projects from scratch and helped to refactor and improve code quality in legacy codebase.

Software Engineer at Software AG

September 2017 — August 2018

Testing software features using JUnit and Selenium and development of internal tools. Managed to optimize stability and execution times of existing test suites.

Education

Masters, Technical University of Košice

September 2015 — May 2020
